VAKAR ALIZADE

About Us

Just Human International Association was founded in 2012 by a group of friends who aimed to spread their humanitarian aid activities to different parts of the world.

Our founders believe that education is important to humanity. For this purpose, they began providing scholarships, clothing, accommodation and stationery needs of students who had financial difficulties throughout their school life.

Since 2019, our association has started receiving funding support from national and international institutions/organizations, and we have been carrying out projects in various parts of the world within the framework of the United Nations (UN) Sustainable Development Goals.

Our association quickly completed its institutionalization process and thanks to the project partnerships established at the international level, we can rapidly organize and provide assistance to people in need.

Our expert and experienced professional volunteers working under our headquarters continue to carry out our aid projects in emergency relief, housing, education, food, development, protection, health, clean water, and sanitation.

Just Human International Association has received recognition for its aid projects under the name of Just Human on the international platform. Our association works to provide humanitarian aid to anyone in need, regardless of their religion, language, race, or sect, who has been affected by any kind of difficulty, war or natural disaster anywhere in the world.

PROTECTION

In humanitarian crises around the world, including armed conflicts, disasters, and migration movements, children and women are the most at-risk, most vulnerable, and most affected group.

High levels of civilian deaths, injuries, exposure to violence, psychological traumas, child and women abuse, child labor, recruitment of children into armed forces, lack of education, nutrition, housing, health problems, orphanhood, and abandonment, are among the many hardships faced by vulnerable and aid-dependent individuals, which create a sense of responsibility for all of us.

Every kind of support and goodness given to those affected by conflict, disasters, and migration is crucial, and it will contribute significantly to their situation.

As Just Human Association, we offer support and create projects with your contributions for people who have been deprived of their basic right to a safe and dignified life due to reasons such as disasters, pandemics, conflicts, and poverty.

EDUCATION

Education is one of the most fundamental rights for every child. For children who are deprived of this right due to their circumstances, we prepare the foundation for them to receive education in better conditions by building schools, providing necessary educational materials, and sponsoring and supporting the renovation of local educational institutions.

”

"If a sophisticated person does not encourage others to work, it is like a person who has gold and buries it but does not loan it to people in need."

SHELTER

Shelter is a fundamental human need and right. The main reasons why people are unable to fully exercise this right include war, armed conflict, drought, forced displacement, poverty, and discrimination. To make this right visible and to eliminate or minimize the problems encountered, Sadece İnsan International Aid Association is working to reach millions of people in need through the relief efforts we carry out in crisis areas. In cases where victims have been deprived of a home to live in due to natural disasters, war, or economic reasons, we provide support by setting up temporary shelters, building homes, and providing necessary aid for repairing and renovating existing shelters.
